

## ROTOR STRUCTURE OF MOTOR

### ABSTRACT OF THE DISCLOSURE

A rotor structure of a motor is provided. The rotor structure  
5 includes a magnet having a first annular wall, a magnet holder having a  
base and a second annular wall connected with the first annular wall of  
the magnet for fixing the magnet, a shaft having one end mounted  
through the base of the magnet holder, and a stopper mounted in the  
other end of the shaft.
